| Organization / College | Vishnu Institute of Technology                                                                                                                           |
| Status / Version       | Approved / v1.0 (Exact Replica Format)                                                                                                                   |

## Stakeholder Profiles: Bank Credit Underwriters

| Empathy Quadrant | Appraiser/Credit Officer Perspective                                                                                                      |
|------------------|-------------------------------------------------------------------------------------------------------------------------------------------|
| SAYS             | I want a clear rationale for why a loan request is flagged as risky. Let's make sure the prediction handles outliers.                     |
| THINKS           | I hope the system is objective and doesn't reject deserving applications. Will the automated parameters account for co-applicant incomes? |
| DOES             | Double-checks tax documents, runs credit bureau scores, compiles reports for the audit board.                                             |
| FEELS            | Overworked because of backlog queues; apprehensive about missing default warning indicators.                                              |
